---

Full-stack developer building web applications, real-time tools, and interactive experiences.
Software Engineering student at African Leadership University, 2026-2029.

### EXPERIENCE

#### Teleoperations Technician

Verlet Robotics - Kigali, Rwanda | April 2026 - Present

#### Full-Stack Engineer (Contract)

AI Factory Dynamics - AgenticERP | May 2026 - Present

### EDUCATION

#### BSc Software Engineering

African Leadership University, Kigali | 2026 - 2029 (expected)

### TECHNICAL TOOLKIT

React, Next.js, JavaScript, TypeScript, Tailwind CSS, Vite
Node.js, Express, REST APIs, Socket.IO, JWT, MySQL, Prisma
Docker, Docker Compose, Nginx, Linux, Git, Vercel
Three.js, React Three Fiber, GSAP, Framer Motion, Leaflet

### SELECTED CAPABILITIES

- Build React and Next.js interfaces with JavaScript, TypeScript, and reusable component systems
- Develop Express APIs with authentication, MySQL persistence, and Prisma data models
- Connect applications with Socket.IO, media streaming, and AI provider APIs
- Package applications with Docker, Docker Compose, and Nginx
- Explore Kigali transit through a frontend map prototype with simulated vehicle positions and ETAs
