Work Experience

Teleoperations Technician — Verlet Robotics (Apr 2026 – Present)

Operate robotic systems for data gathering and teleoperation tasks in real-world environments. Collect and process operational data to support robotics system improvements.

Frontend Developer, AgenticERP — AI Factory Dynamics (May 2026 – Present)

Built the frontend for an AI-powered ERP assistant: 10 LangGraph agent tools across cash, sales, and cross-domain analytics, with real-time SSE streaming chat and an abstract ERP connector supporting both mock data and live Odoo integration.

Selected Projects

GMC Kimihurura *(Oct 2024 – Dec 2025)*

Next.js, Prisma, MySQL, Docker, Google Gemini AI

Full-stack church management platform built for a real congregation in Kimihurura. Architected a 7+ model schema, a JWT-authenticated admin dashboard, and a Dockerized production deployment with Nginx and automated database setup.

accessPc *(Oct 2025 – Mar 2026)*

React, Express, Prisma, MySQL, HTTP Range streaming

Self-hosted personal media server with folder browsing and watch-history tracking. Implemented HTTP Range-request streaming with seek support and a recursive media scanner with metadata extraction.

Kigali Smart Bus *(June 2026)*

React, Leaflet, OpenStreetMap, OSRM routing

Frontend bus-tracking prototype simulating 8 buses across 3 real Kigali routes on an interactive map, with OSRM road-following and live ETA calculations.

Chat General *(April 2026)*

React, Socket.IO, Express, OpenRouter AI, Piper TTS

Real-time AI chat application with browser-based text-to-speech, multi-model AI responses via OpenRouter, and a resizable terminal-styled UI.

Education

BSc Software Engineering (2027 – 2029, expected)

African Leadership University (ALU) — Kigali, Rwanda.

Summary

Self-taught full-stack engineer pursuing a BSc in Software Engineering at ALU while shipping production-grade applications across the stack — from AI-powered ERP assistants to mobile money tracking and public transit visualisation.

Combines modern full-stack development with AI/LLM integration and DevOps, bringing real-world operational experience from Verlet Robotics.

Skills

React / Next.js / TypeScript
Node.js / Express / FastAPI
LangGraph / LangChain / Gemini
Prisma / PostgreSQL / MySQL
Docker / Nginx / Git

Languages

English (fluent)
Kinyarwanda (spoken)
